Crealco product range is available from the following Wispeco Appointed Stockists:

This brochure must be read in conjunction with the Installation, Cleaning & Maintenance Guidelines and Performance Certificates for the relevant system. The Manuals must also be used in conjunction with the design and cutting lists from the latest version of Starfront.

The Crealco WRAP window is a new innovation in aluminium window systems, bringing together the weathering capabilities and versatility of an aluminium window, with the economical putty glazing and hardware systems associated with steel windows.

The window system has been designed to bridge the gap between Aluminium and Steel window systems, ensuring that all areas of the market have access to the benefits of weatherproof fenestration.

FEATURES

- Designed for putty glazing
- Square cut profiles and plastic corner jointing
- Simple Hardware and limited components
- Window is draft-free and watertight due to the use of effective seals

GLAZING

- The system has been designed to accommodate only 4mm float glass which is the standard for this application.

SEALS

- The glazing is effectively sealed with Glazing Putty
- The sash is sealed with woolpile

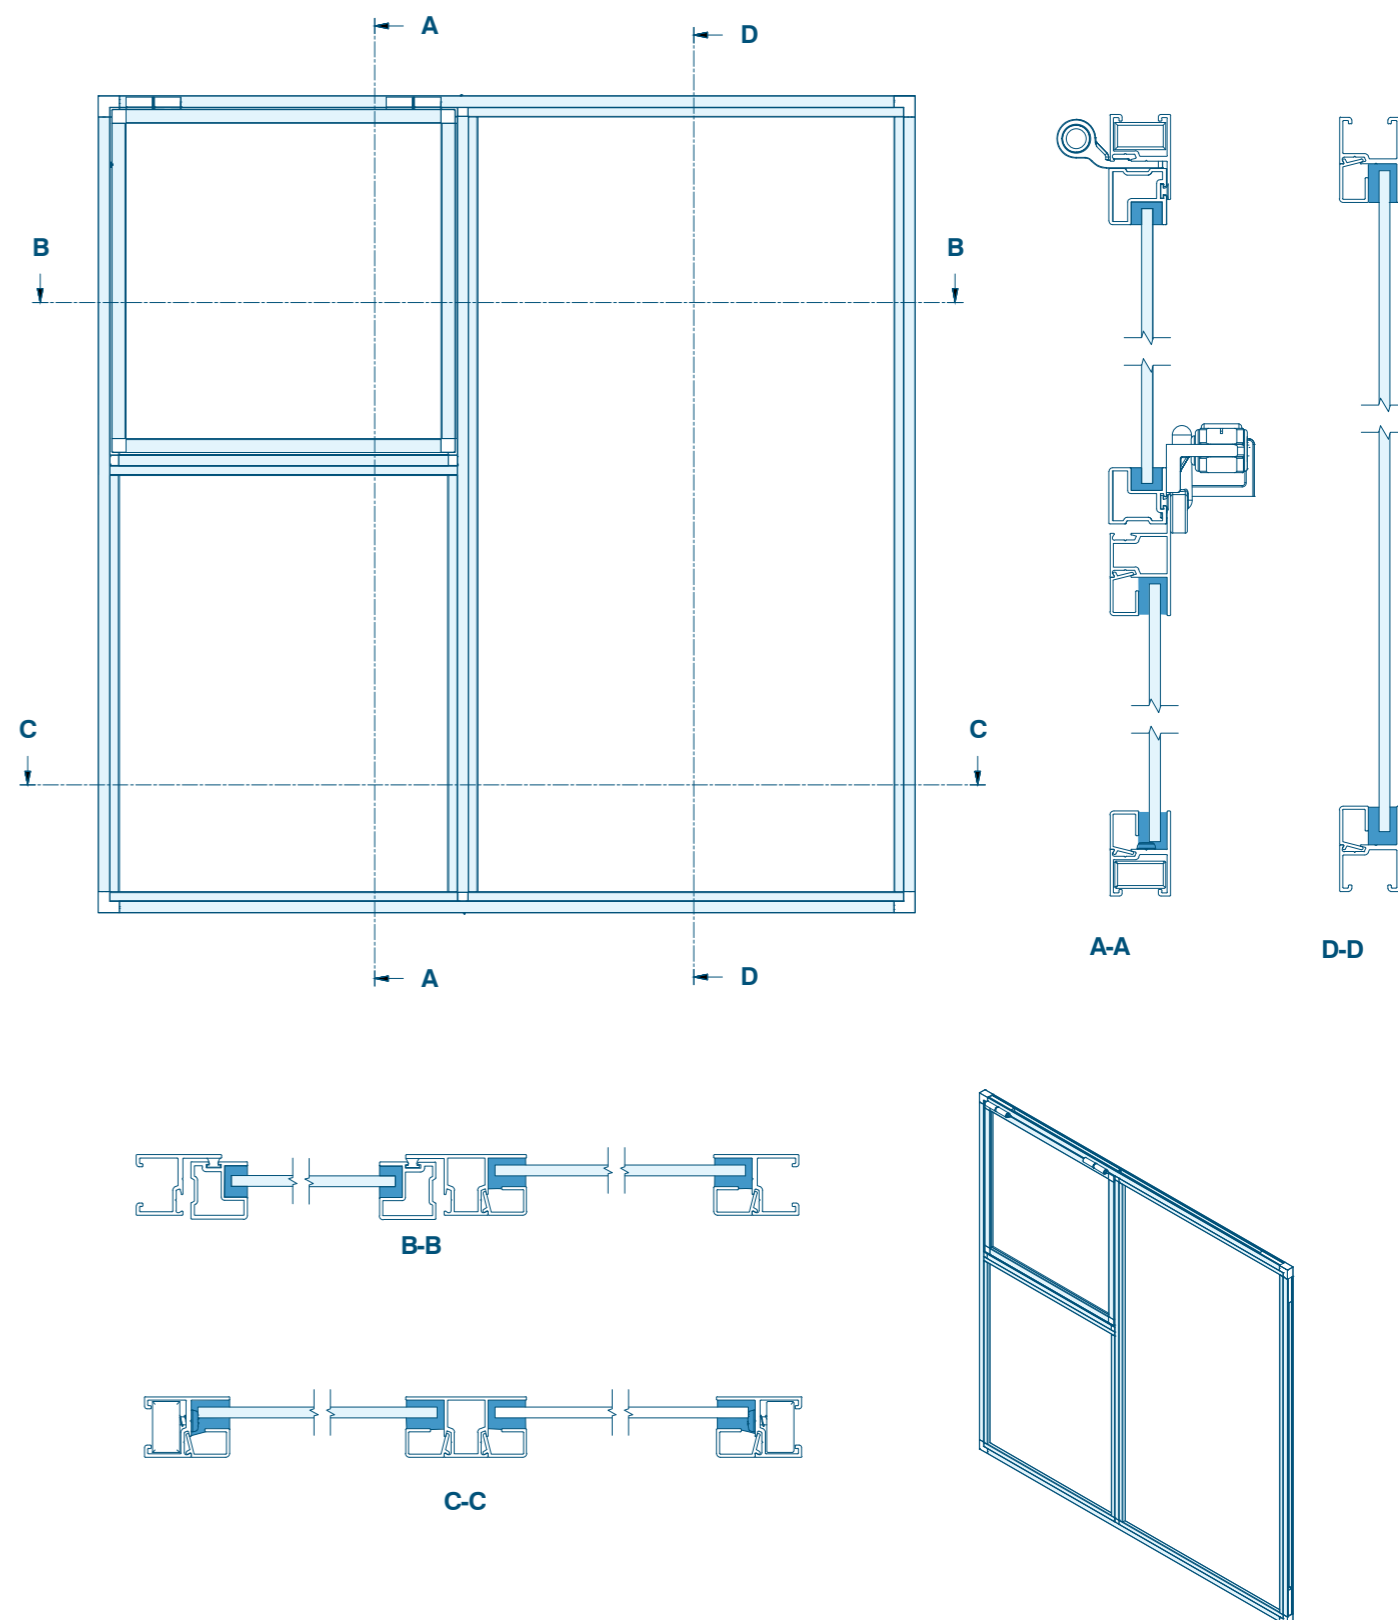

FINISH

- Currently available in black and white
- Plastic components match the extrusion profile colours

HARDWARE

- All hardware has been designed to match the profiles
- Peg stay and hinges have been redesigned in plastic to reduce cost and weight
- Hardware available in pre-packaged kits
